

PATENT APPLICATION

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

INVENTOR: McMinn, Pearson V., Jr.

APPLICATION NO.:

FILING DATE:

TITLE OF THE INVENTION: SYSTEM & METHOD FOR VENT HOOD CLEANING AND
COMPREHENSIVE BIOREMEDIATION OF KITCHEN
GREASE

EXAMINER: unknown

GROUP ART UNIT: unknown

ATTORNEY DOCKET NO.: ALLI001B

Box Patent Application
Assistant Commissioner For Patents
Washington DC 20231-0001

PRELIMINARY AMENDMENT

Please amend the application as indicated on the following clean and marked-up versions of the specification and claim changes enclosed pursuant to rule 1.121. After the preliminary amendment claims 1, 3 & 4 are pending. Please consider and examine the application. Please telephone the undersigned attorney if it could help to expedite the resolution of this application.

Respectfully Submitted,

Date: 8/14/01

Attorney for Applicant

REVISED SPECIFICATION PARAGRAPH(S) (clean version)

Please change the paragraph at page 1, lines 3-4 of the specification as follows:

This application claims benefit of U.S. patent application numbers 09/253,966 filed February 22, 1999 which is a continuation-in-part of U.S. patent application no. 08/678,104 filed July 11, 1996.

REVISED CLAIMS (clean version)

2. [cancelled]

4. (new) A method for controlling and monitoring a system for remediation of commercial and institutional kitchens, comprising:

detecting parameters within the system;

communicating the detected parameters to a control unit within the system;

communicating the detected parameters to a remote host computer;

displaying operational information for the system;

initiating remediation activities within the system based on the communicated parameters including turning equipment within the system on and off.

REVISED SPECIFICATION PARAGRAPH(S) (marked-up version)

Please change the paragraph at page 1, lines 3-4 of the specification as follows:

This application claims benefit of U.S. patent application numbers 09/253,966 filed February 22, 1999 which is a continuation-in-part of U.S. patent application no. 08/678,104 filed July 11, 1996.

REVISED CLAIMS (marked-up version)

2. [cancelled]

4. (new) A method for controlling and monitoring a system for remediation of commercial and institutional kitchens, comprising:

detecting parameters within the system;

communicating the detected parameters to a control unit within the system;
